ORALNOVA AI

AI-Assisted Oral Image Analysis Report

Educational Research Prototype

Generated: 11/10/2026, 3:50:54 AM

---

1. Image Information

File name: 46e21e7be60567c4b9b2ca9018587f88_XL.jpg

File format: JPEG

File size: 251.29 KB

Dimensions: 744 × 557 px

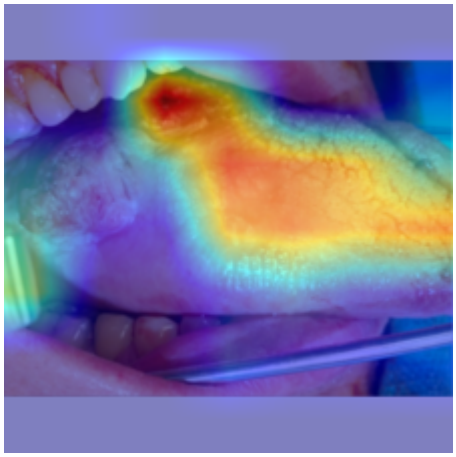

2. Research Pipeline

Clinical MobileNetV3-Small

3. Original Uploaded Image

4. Grad-CAM Visualization

Grad-CAM visualizes image regions influencing the model output. It does not confirm lesion location.

5. Model Output

Prediction: cancer

Model score: 87.36%

Model score is not a clinically validated probability.

Class Outputs

cancer: 87.36%

non-cancer: 12.64%

6. Technical Validation

PASS: Image readability - Image loaded successfully.

PASS: File format - JPEG is supported.

PASS: File size - Image is within the 10 MB limit.

PASS: Image dimensions - 744 × 557 pixels meets the minimum 224 × 224 requirement.

Research Disclaimer

ORALNOVA AI is an educational research prototype, not a medical diagnostic system. Model outputs and Grad-CAM visualizations are experimental. They must not be used to diagnose, rule out, or guide treatment of oral cancer. Grad-CAM does not confirm lesion location.
